

This document is part of the syllabi of the seminars „41-318 Seminar: Critical Examination of Examples of Educational Research on Self-Regulated Learning“, and „41-319 Seminar: Critical Examination of Examples of Educational Research on cooperative and collaborative Learning“ by Maya Persico in summer semester 2025 at University of Hamburg. It contains the task descriptions for interim and final reflection of the seminar.

Interim reflection task

Interim reflection

How has the seminar been for you so far? What were your expectations, and to what extent has the seminar been positive/negative for you? How do you feel about the working atmosphere, the structure of the sessions and the organisation? Do you have any feedback for me as a lecturer? What would you like to see from the groups that are still moderating? What have you taken away from the seminar so far? Is there anything you would like to do after the holidays as a result of the seminar? Is there anything you would like to take away with you for your teaching practice?

If you would like to reflect on other aspects, please feel free to do so :)

Final reflection task

Take a little trip down memory lane. You can work on this reflection from memory or use the prompts listed below. If necessary, take another look at your 'Expectations of the seminar' from the first session and the 'Mid-term: interim reflection on the seminar'.

How did the seminar turn out for you in the end? Compared to your expectations and the mid-term, to what extent was the seminar positive/negative for you? How do you feel about the working atmosphere, the running of the sessions and the organisation (e.g. the compulsory consultation hours)? Do you have any feedback for me as a lecturer? What would you like me to communicate differently to the next seminar group? What are your final takeaways from the seminar? Is there anything you would like to do as a result of the seminar? What will you take away for your teaching practice?

If you would like to reflect on other aspects, please feel free to do so :)
