SETTINGS (LIDS)

You are invited to attend the Next Generation Literacies Online Workshop on *Open Science*

Open Research in Education – Connecting Research, Practice and Infrastructure

This talk outlines some main developments in Open Science and aligns them with educational research. It encompasses the following aspects:

- a sketch up of Open Science from the EU to UNESCO
- open research practices and enabling infrastructures
- alignments of Open Science with educational research
- engagement through the European Network Open Research in Education (EERA)

The talk assumes an open format to stimulate engagement, both before and after. What are your ideas and questions about Open Science and research in education? You are kindly invited to share your ideas via the etherpad: https://yopad.eu/p/NextGenLit_Open_Research_in_Education-365days

Please feel free to add your thoughts and questions to this etherpad prior to 29 February!

Dr. Christoph Schindler is head of Literature Information Systems at the Information Centre for Education of DIPF | Leibniz Institute for Research and Information in Education since 2016. He obtained his PhD in Information Science from the University of Hildesheim for an ethnographic study on information practices in educational research. He has realised several projects in digital humanities, science studies, open infrastructures and knowledge graphs, and is network convenor of Open Research in Education of the European Educational Research Association (EERA).

Thursday, 29 February 2024

09:00-10:30am CET on Zoom

Registration: sarah.mcmonagle@uni-hamburg.de

Please register by 16 February!
